

## Principles and rules

Assuming a bank account you should think about a separate mail account and password just for this purpose. Password should not be easy to break, should be a combination of letters and numbers. It is necessary to save him, not only on the disk, because if your computer crashes, you can easily lose. Using the same password for banks, businesses and instant messaging is always a big threat to the security of your account. Not uncommon are rattled not only bank accounts but also in companies. Broken or known by someone is usually the effect of changing the password and mail password, you clear your account, including companies. Burglar if they will not be able to pay the accumulated funds will give them to your ad.

If possible, ensure a good and active antivirus program and firewall (firewall). On many websites you visit, you can (often regardless of the will of the webmaster) to meet the threat. It should also think about the safest and convenient web browser, a lot of people claim that it is best put to test Firefox and Opera, which is not only more functional than Internet Explorer, but also safer. Prior to registration in the companies, think of a good mailbox (or several), and the most capacious, with which e-mails would not be reflected. The general opinion in the best practice I draw on o2 and gmail. Registration requires an invitation to gmail, but it is not difficult, many people may request them to share. Prior to registration of the company it is necessary to review the rules as a condition to participate in the program. The Polish companies is the Rules, Terms in English-speaking, the German AGB. It is also always view the FAQ section, which generally contains the answers to all the pre-standard questions and check whether the company has its own forum or support available, where you can quickly get answers to questions and obtain information on new products.

Never sign up several times in the same company, creating multiple accounts. This is generally prohibited everywhere and easy to verify (IP) even gave a variety of personal data. There is a general principle: one computer - one account. This excludes the possibility of registration of other family members in the same program Trade account is generally prohibited, redemption or acquisition of another's account without the knowledge and consent of the webmaster (some companies can get so often the subject is of interest charged on the sum of the proceeds of sale) with the risk of losing the account and the funds collected and those recommended. It is so good to reflect on the meaning of "incidental" to purchase such EBAY, especially since a lot of people get rid of accounts in the companies failing or insolvent arguing that "a departure from the get-paid, going abroad, lack of time, science or the need to work" etc. Registering the company should be given more real data, in most database systems are protected. When saving for the future of enterprise value links to them at once to add to "favorites" - it saves time and trouble to find. In completing the registration form should be paid attention to the need for the selection of interest. They serve not only to advertising directed to specific recipients, but are often a test of attention or knowledge of the person registering. Selecting phrases "I can not read" remove me "" me speak no "" delete me "Reed for ads only" I am cheater "etc. result in your account. A similar effect has a selection of search "(search) outside the" international search ", because Poland does not belong to a group search country from which searches are permitted. When you receive your ad, you pay attention to the titles of e-mails and text ads. Often these are test ads, so. Cheat links checking account customers, who pay for the proper reception of the ad. Thoughtless and inattentive clicking often is the cause of loss of earnings, and after three clicked causes the removal from the system. It frequently happens that users unwittingly click on cheat link in an email, or banner with a negative value in the PTC section, not only do not know the cause of the loss of earnings, or removal from the system, but still express indignant, often vulgar, protests " removal of the innocence of the company's unfair. " After registration, the company should always be checked in the user panel, all available sections, avoiding the Search PTC and noting the time in which usually there are new ads. This will allow the withdrawal of advertising, before the expiry of its validity will lose the opportunity to earn. Order your ad or filling out forms, remember that most scripts do not tolerate characters, so. "tailing". Issued content from those used characters "A, E, Z, L, S," etc. will be unreadable for the recipient (bushes) By obtaining the company paid the minimum needed to keep in mind that in most of the payments are not automatic and immediate in some contract payments may be made within certain time limits. Time as the normally ordered payment terms. In any ambiguous situation should contact the webmaster in writing by the department "contact" on the company's website.

The best way to do it in a polite and cultured, very little cost, and promotes good contact. When ordering the company advertising PTP should first ensure that promoted in the list of approved. Promoting must first check from which country accepts and includes Traffic (search) Promoting the company in order to get registered you should think about their own website, even a simple table. This increases the chances of building a good grid recommended. Should always avoid spamming and copying the work of others in whole or in part.
